PROFESSIONAL SUMMARY

Final-year Bachelor's student in Computer Science and Artificial Intelligence at William Booth University, with hands-on experience developing full-stack web applications using Python, Django, React.js, and PostgreSQL. Skilled in building REST APIs, designing relational databases, and integrating frontend and backend components. Developed an AI-powered educational assistant as a major academic project, combining web development, REST APIs, databases, and Natural Language Processing. Motivated to build reliable and practical software solutions while continuously improving software engineering skills.

TECHNICAL SKILLS

LANGAGES DE PROGRAMMATION

Python, JavaScript, TypeScript, HTML5, CSS3, SQL

FRONTEND: React.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design

BACKEND: Django, Django REST Framework, REST APIs, Node.js

AI & NLP: Artificial Intelligence, Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), AI Chatbots

DATABASES: PostgreSQL, SQLite, Chromadb

DEVOPS & TOOLS: Git, GitHub, VS Code, Docker

OTHER: API Integration, Full-Stack Web Development

FORMATION

William Booth University /Kinshasa

Bachelor's Degree in Computer Science and Artificial Intelligence

2023-2026

CERTIFICATIONS

- INTRODUCTION TO DATA ANALYSIS USING MICROSOFT EXCEL

Coursera | May 2026

PROFESSIONAL EXPERIENCE

IT INTERN — INSTITUT NATIONAL DE LA STATISTIQUE (INS)

Kinshasa, Democratic Republic of the Congo | July 15 – August 15, 2026

- Worked within the IT Department on data processing and analysis activities.
- Used Microsoft Excel and RStudio for statistical data processing and analysis.
- Performed demographic calculations related to population data.
- Worked with population and demographic datasets to support statistical analysis.
- Applied quantitative and analytical methods to demographic data.

KEY PROJECTS

INTELLIGENT EDUCATIONAL ASSISTANT

Django REST Framework | React.js | PostgreSQL | ChromaDB | RAG | NLP | Docker | Git/GitHub

2026 – Present

- Designed and developed an AI-powered educational assistant for university students.
- Built the backend using Django REST Framework and developed REST APIs for frontend-backend communication.
- Developed the frontend using React.js and TypeScript.
- Designed and managed PostgreSQL databases.
- Implemented Retrieval-Augmented Generation (RAG) to improve the assistant's ability to provide context-aware academic responses.
- Used ChromaDB as a vector database for storing and retrieving relevant knowledge.
- Applied Natural Language Processing (NLP) concepts to understand and process student queries.
- Integrated AI-powered chatbot functionality to assist students with academic questions.
- Used Docker for application containerization and development environment management.
- Used Git and GitHub for version control and project management.

WEB APPLICATION DEVELOPMENT

HTML | CSS | JavaScript | TypeScript | React.js | Django | SQL

2023 – Present

- Developed responsive web applications using HTML, CSS, and JavaScript.
- Created reusable React.js components for frontend development.
- Built backend services using Django.
- Designed and worked with relational databases.
- Integrated frontend interfaces with backend services.
